4 / 19

FIG. 4

A http://www.foo.com/index.html

URL protocol part URL host part URL path part

```
A2    http://www.foo.com:80/index.html
                        |
                    URL port part
```

B

http://www.foo.com/cgi-bin/access.cgi?param

URL path part

directory part

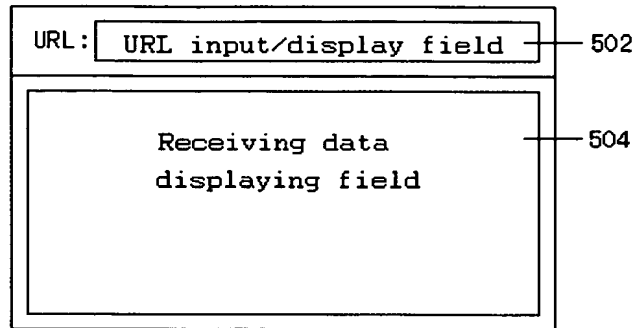

CGI program name

Parameter for CGI program

Indication string for following parameter(s) for CGI program

5 / 19

FIG. 5

09/720969

6 / 19

FIG. 6

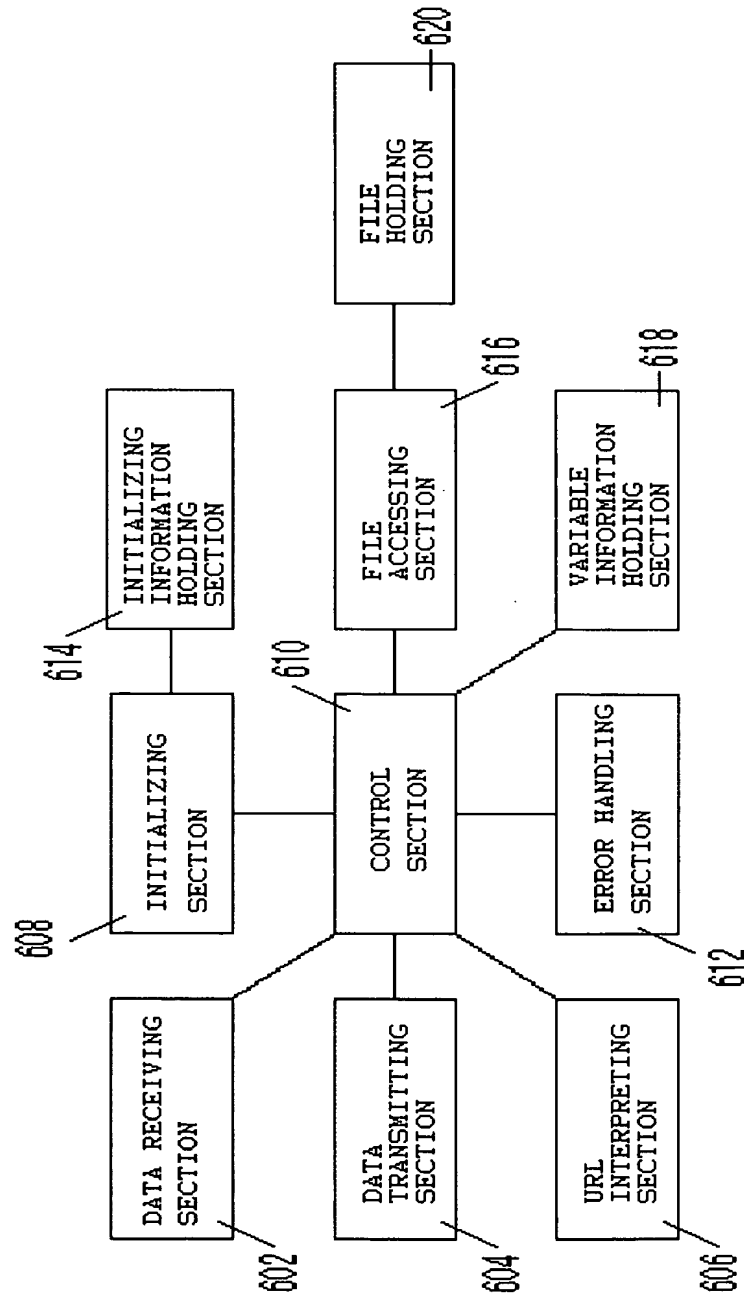

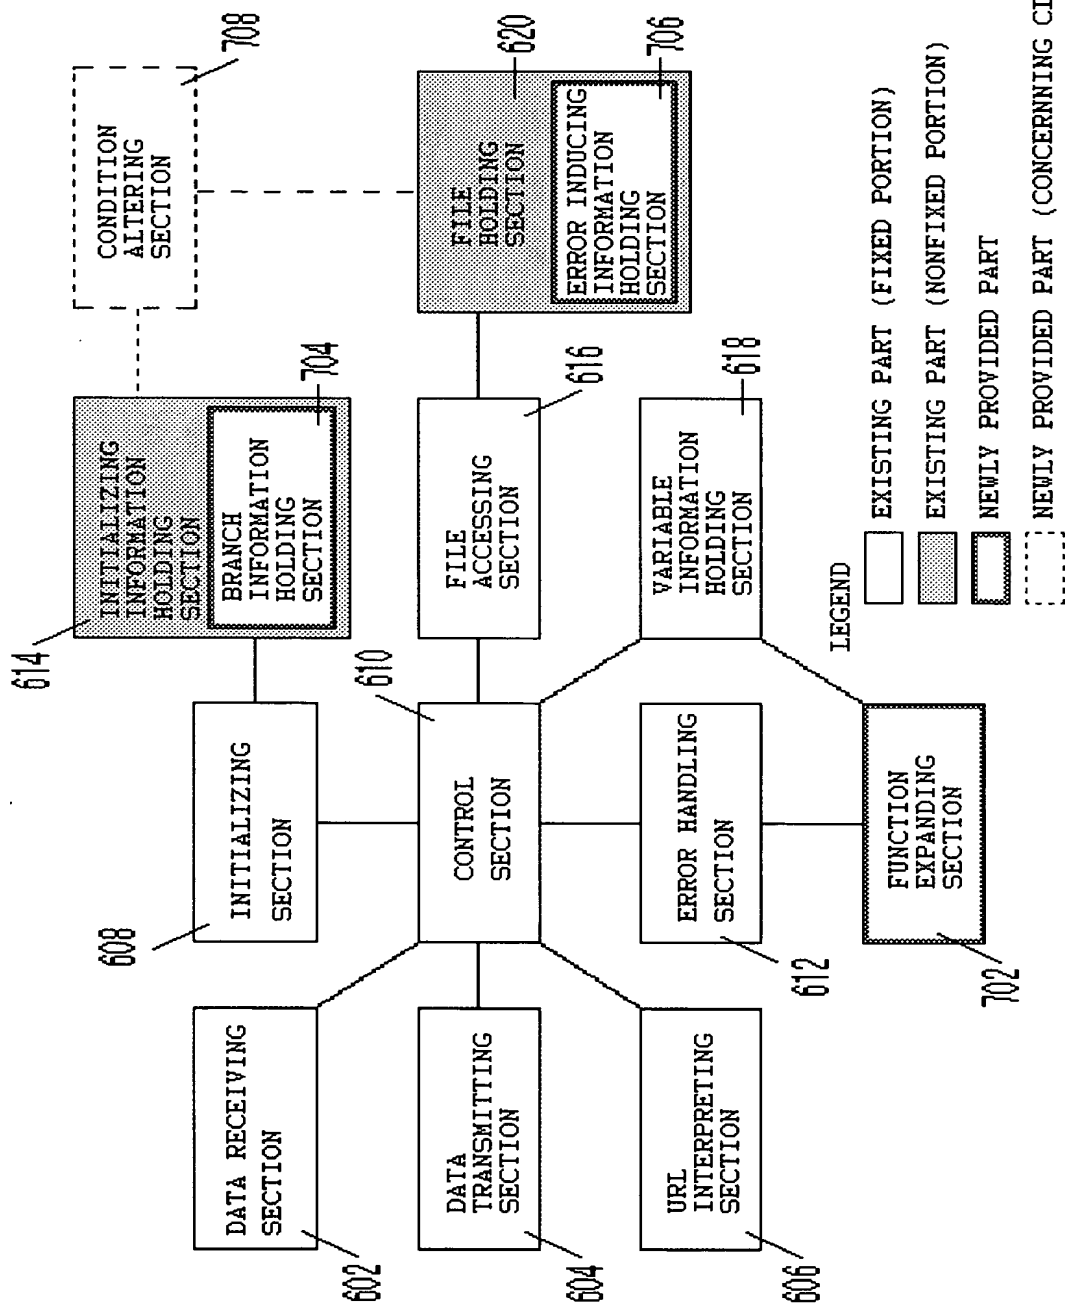

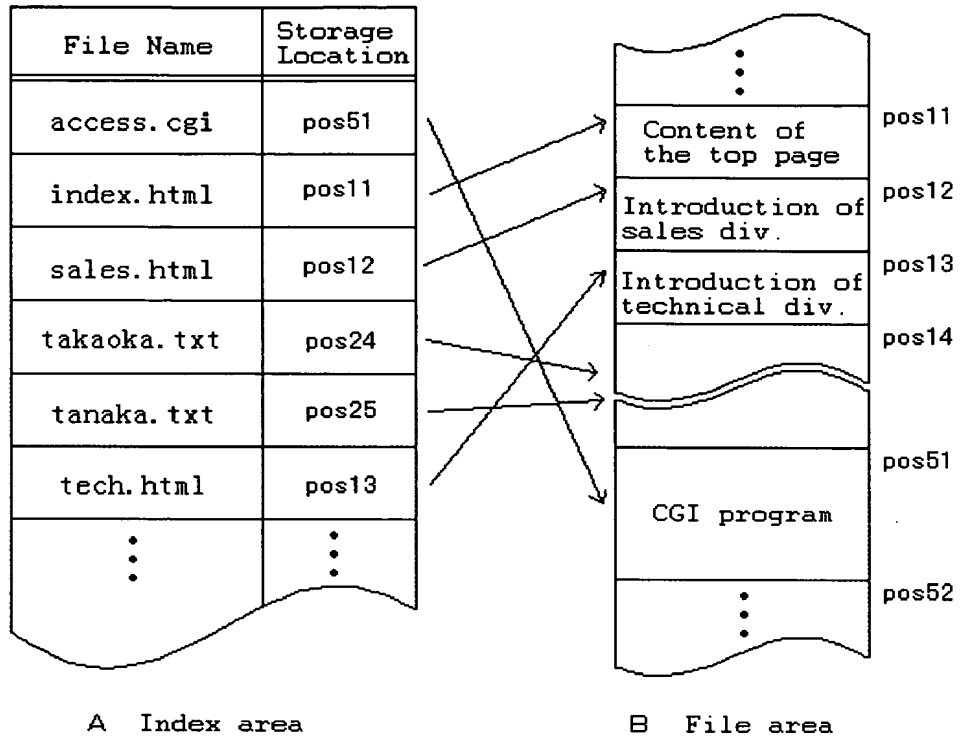

FIG. 7

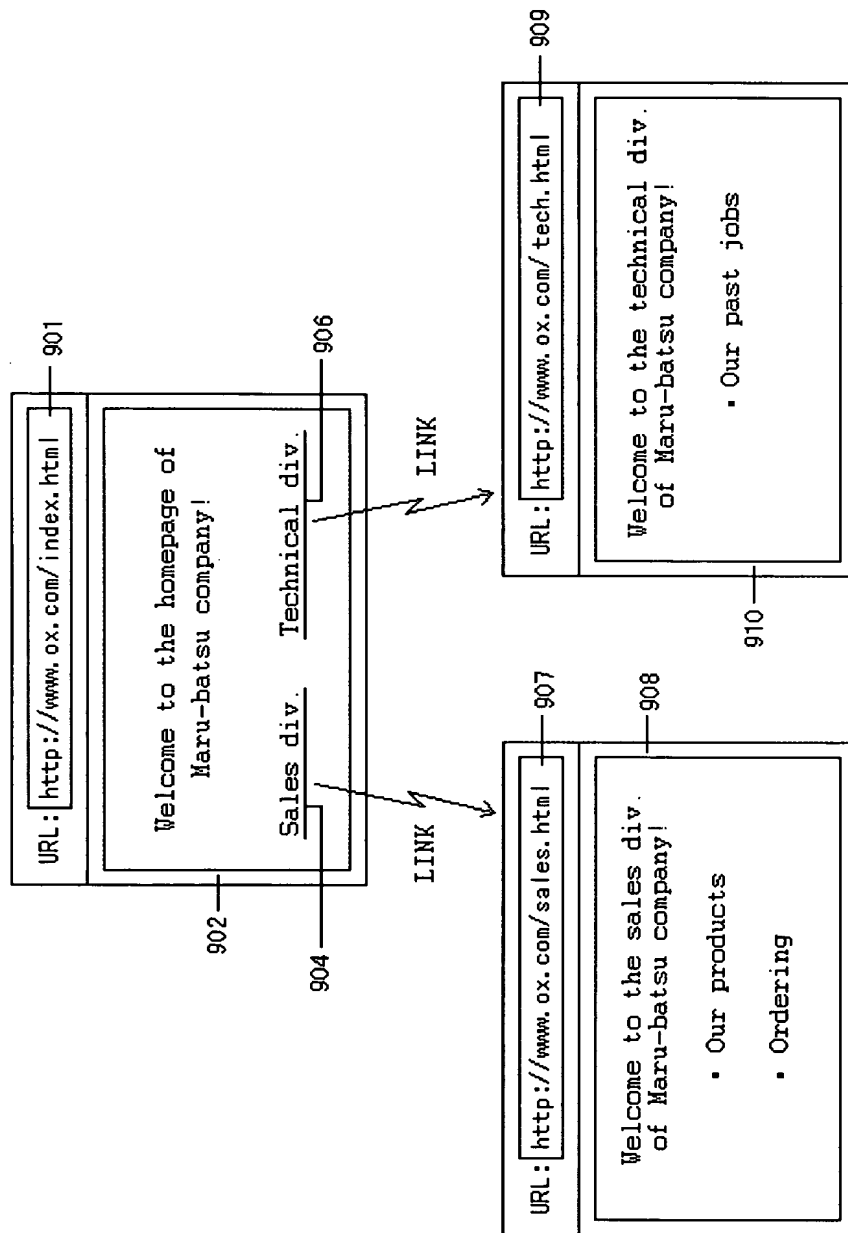

8/19

FIG. 8

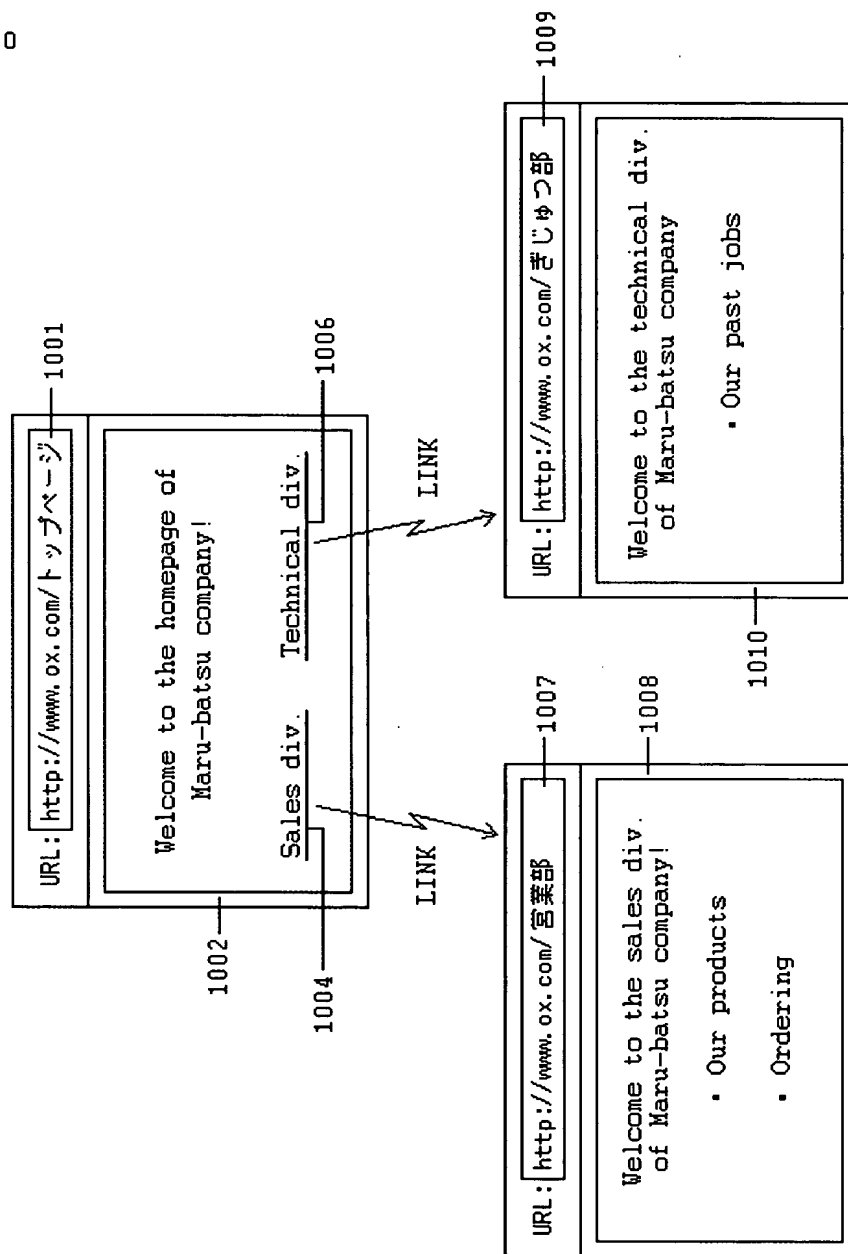

9/19

FIG. 9

10/19

FIG. 10

Translator's note:

original (including Kanji, Hiragana, and Katakana) and Katakana)

corresponding/description

トップページ

top page (all portions are expressed by Katakana)

営業部

sales division (all portions are expressed by Kanji)

ぎじゅつ部

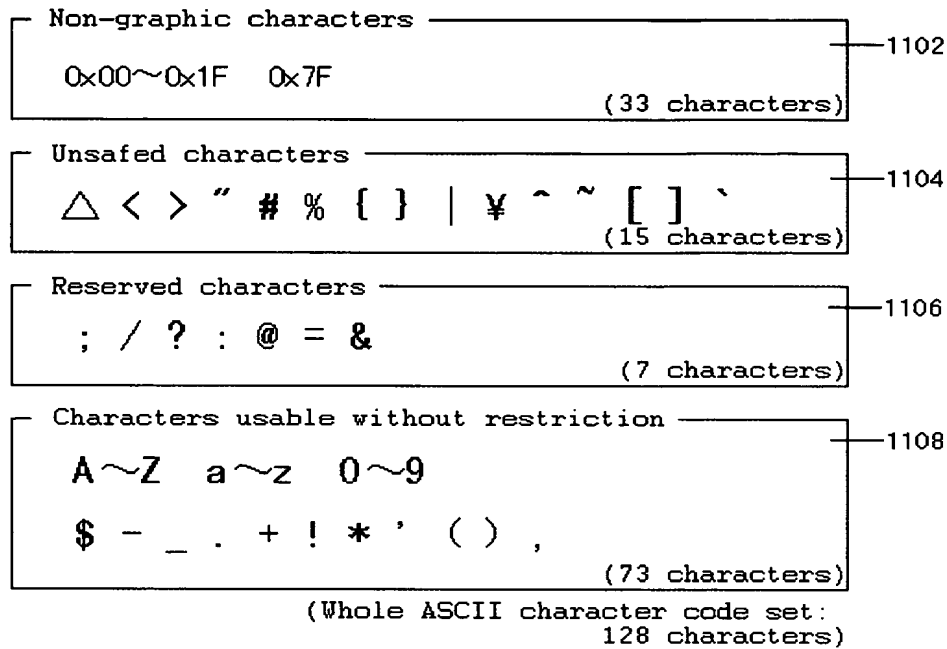

technical division ('technical' portion is expressed by Hiragana)

The reason why this table is described in FIG.13's note.

11/19

FIG. 11

※△ = Space (Blank) = 0x20

※Non-graphic characters are expressed in hex-decimal.

※Source: RFC 1738 "Uniform Resource Locators (URL)"

09/720969

12/19

FIG. 12

A URL: `http://www.ox.com/sales/How-much?`

B URL: `http://www.ox.com/sales/How-much`

C URL: `http://www.ox.com/sales/How△much?`

LEGEND: △ -- Blank character of US-ASCII which is expressed in manner of C language: 0x07. It is called "half-size space" in Japan.

※ The mark is also used in other FIGs.

13/19

FIG. 13

- A `http://my.name.is/林毅`
- B `http://my.name.is/?林毅`
- B2 `http://my.name.is/index.cgi?林毅`
- C `http://your.name.is/林毅?`

Translator's note:

Kanji characters in A, B, B2, and C are not translated into English to hold their meanings in the present invention. A near-equivalent expression of A is that:

`http://my.name.is/HAYASHI△Tsuyoshi`

where 'HAYASHI' and 'Tsuyoshi' are corresponding to a '林' and '毅' respectively. And '△' is as a space (blank) character for a separator between the family name (林) and the first name (毅).
